

Specification

Fully secure – PCI Level 1 Compliant, 3D Secure and Visa Approved with DDoS mitigation and velocity checking anti-fraud controls.

- Compatible with almost all major shopping carts – including WooCommerce, Magento and Prestashop.
- Free Shopping Modules, Software Development Kits (SDKs), and sample code.
- Supported shopping carts making integration simple.
- Pay button and QR code – simply copy the button into e-mails, texts and WhatsApp to receive payments.
- Customisable Payment Page – multiple configurations to give the merchant as much control over their payment page as they require.
- Compatible with 150 Alternative Payment Methods (APMs) – including Paypal, Android Pay and Amazon Pay.
- E-mail receipts – autogenerated branded e-mail receipts can be sent to the customer.
- Intelligent routing – makes accepting AMEX a breeze.
- Tokenisation – a secure way to set up recurring payments.
- Full mobile integration – accept payment within your pre-existing mobile app.
- Real-time reporting of transactions – including alerts about chargebacks and a traffic light system with detailed information on why transactions have been unsuccessful.
- Powerful virtual terminal – take payments over the phone with features such as multiple users, Interactive Voice Response (IVR) for call centres, and pre-authorisation functionality.
